THE REAL 3 LAKES TOUR

Rather than simply skirting the lakes as in the classic version, this route takes you on a real tour of the 3 lakes - a complete loop in which each lake is revealed from its most beautiful angles. A little more challenging and slightly longer, this hike takes you through stubble fields, forests and ridges, linking the lakes by the most beautiful paths for a complete discovery of these high altitude jewels.

DEPARTURE : Col du Calvaire

MARKINGS        

DESCRIPTION

1 From the Col du Calvaire parking lot, cross the road and take the path (red ring) up to the ridge. Follow the ridge until you reach the Hans rock.

Option: From the Col du Calvaire parking lot, cross the road and follow the red rectangle along the lake to the parking lot, then climb the ridge via the Hans rock (red ring).

2 Fork right to the Belmont observatory (yellow trestle), then left to Lac Noir (blue circle). Further down, change to the yellow ring to go all the way round.

3 Before the Lac Noir dam bridge, climb up to the small path on the right (blue circle). When it joins a wide path, turn left (red circle) towards Lac des Truites.

Walk along the lake to the inn, then follow the winding path up to the top of the Gazon du Faing (red triangle, then yellow triangle).

4 From the summit, return to the Col du Calvaire, your starting point, following the GR5 (red rectangle).

Option: at Lac Blanc, turn right to follow the crest of the lake (red white red rectangle then red ring).
