THE TOUR OF THE 2 LAKES

This hike with a somewhat sporty profile goes around the two emblematic lakes: Blanc and Noir. A circuit that offers a compilation of both authentic and unexpected landscapes to take in!

DEPARTURE: col du Calvaire parking

MARKINGS:      

DESCRIPTION

- 1 From the col du Calvaire car park, cross the road carefully to join the small path that enters the forest 50m below. Follow the red rect. / red ring to go up towards the ridge. Higher up, at the level of the crow's feet, take the path on the right (red rect.).
- 2 Follow the GR5 for several kilometres, ignoring the first intersection on the left. At the next intersection, turn left towards "LAC NOIR". At the next intersection, you have the possibility to go back and forth to the source of the Lac Noir. Back on the path, continue down to the lake.
- 3 When you reach the lake, take the path immediately to the right (yellow signpost) which goes around it.
- 4 At the next intersection, after the two rock slides, follow the path up to the right (blue circle). After a few steep kilometres, do not miss the intersection on the right that leads to the Belmont observatory.
- 5 Continue towards the white lake (yellow trestle). The path leads to the top of Hans Rock. Return via the ridge on the left following the red ring. At the end, you will find the intersection at the beginning to reach your starting point.
